VISIOFFICE® 3: THE RENOWNED REFERENCE IN ELECTRONIC MEASUREMENTS SOLUTIONS

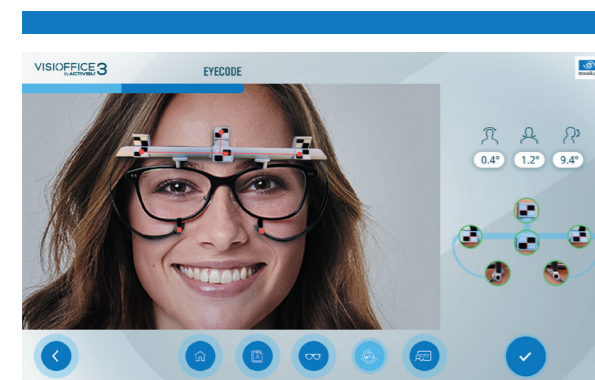

With its latest pure and elegant design coupled with new features, Visioffice® 3 offers the high precision of the Visioffice range. It contributes towards creating a memorable client experience and imposes itself as an indispensable tool for the sale of high-end lenses.

FRAME CHOICE HIGHLIGHT THE IN-STORE SELECTION

Simplify your client's choice by taking photos and videos of them wearing different frames and compare them. This module is particularly appreciated by clients with a high correction.

- › Automatic detection of the client's face
- › Fluid navigation of the interface
- › Compare different photos

EYECODE™ MEASUREMENTS LENS PERSONALIZATION

Obtain unequalled precision of measurements thanks to Activisu®'s 3D reconstruction technology, all in under 40 seconds. Offer a differentiating client experience and accentuate your savoir-faire.

- › Pupillary distances in far vision
- › Fitting heights in far vision
- › ERC and ELD
- › Pantoscopic tilt and wrap angle
- › Dominant eye
- › Reading distance
- › NVB compatible

GO A STEP FURTHER IN LENS PERSONALIZATION WITH THE H3D OPTION

The exclusive and patented H3D protocol carries out a study of the client's natural posture to ensure an optimal visual comfort.

The analysed posture is automatically taken into account in the measurements by Visioffice® 3's algorithms.

VISIOFFICE® 3
A PRECISION
OF 0.1 MM

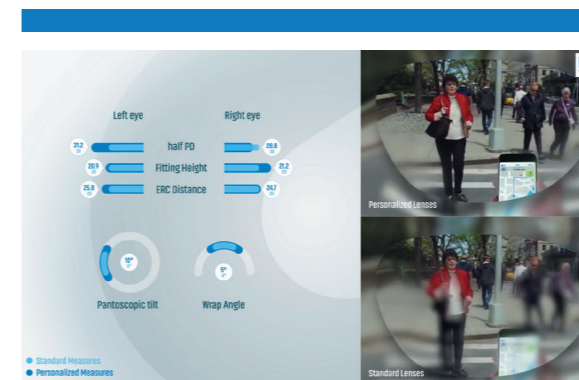

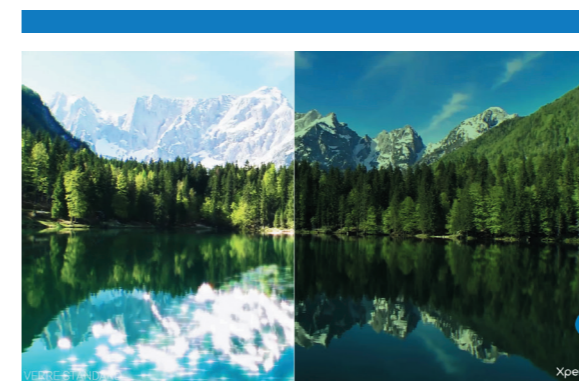

ILLUSTRATION OF THE WEARER'S BENEFITS

ACCENTUATE THE VALUE OF PERSONALIZED LENSES

This interactive module compares the generic values for each measurement with the ones you have taken of your client with Visioffice® 3. It allows you to explain in a simple and comprehensive manner the added benefits of a personalized lens, and also highlights your expertise.

LENS AND TREATMENT OPTIONS

VISUAL AND REALISTIC DEMONSTRATIONS

With new sourced content reflecting the evolving lifestyle of the wearers, choose from a selection of comparative videos to explain the benefits of various lens options and treatments.

CHARACTERISTICS
